

# INTRODUCES

## 3D Ultimate

The ultimate combination of advanced technologies offering a complete and prescriptive approach to non surgical face and body treatments. Our treatments offer a variation of the following technologies and our trained therapists will devise a unique treatment plan especially to suit you

### Cavitation

Cavitation is a natural phenomenon based on low frequency ultrasound. The ultrasound produces a strong wave of pressure to fat cell membranes. A fat cell cannot withstand this pressure and therefore disintegrates into a liquid state. The latest non invasive body contouring treatment for localised fat and deep cellulite.

### Radio Frequency

3D-Radio Frequency penetrates the skin layers to selectively heat the skin tissue and the extra cellular matrix where the collagen fibres are embedded. The local heating of the area being treated causes an immediate contraction of the collagen fibres, and at the same time increases the metabolism of the fibroblasts in order to accelerate production of new collagen fibres and elastin fibres to create a smoother, healthier and younger looking skin.

### CryoLipolysis

3D-cryofreeze is a unique non-invasive treatment using a combination of electro and cryo therapy. Using the 3D-cryofreeze handpiece a vacuum is created which draws the fat in. The localised area within the handpiece is then frozen, causing 20% - 40% of the fat cells in that area to die and dissolve over the course of several months. Two areas can now be treated simultaneously.

### Shockwave Therapy

Shockwave therapy works by stimulating fat breakdown, collagen synthesis and lymphatic drainage via the delivery of radicals shockwaves. This is the latest technology clinically proven to reduce the appearance of cellulite and increase skin elasticity.

### HIFU (High Intensity Focused Ultrasound)

3D-HIFU is the latest technology used to target specific focused areas of fat in the fastest possible treatment time. This technology works by delivering focused energy at a depth of 1.3cm and 8mm to destroy fat cells. The high frequency of the ultrasound wave results in heating under the skin, effectively destroying the fat cells and tightening the skin in the area treated. The damaged cells are flushed away via natural removal process through the lymphatic system that continues for up to 3 months.

## Body Consultation

Our specialist therapists offer a free consultation to analyse your body shape, discuss your main areas of concern and devise a bespoke body contouring treatment plan especially for you. A combination of 3D technologies can be used and prices tailored to suit.

### 3D-Inch Loss Treatment

Slim and sculpt your body with this inch loss treatment. Results can be seen from your first treatment. Using a combination of cavitation and shockwave therapy a full treatment plan will be devised to effectively remove soft fat from your areas of concern. A course is recommended to see transformational results.

**1 Treatment session £125<sup>00</sup>**

**Course of 6 £675<sup>00</sup>**

**Course of 8 £900<sup>00</sup>**

### 3D - Bespoke Cellulite Removal

Using a combination of cavitation, radio frequency and shockwave therapy this treatment will not only banish dreaded cellulite but also tone and firm sagging, wrinkling skin. Ideal for thighs and bum.

**1 Treatment session £95<sup>00</sup>**

**Course of 6 £550<sup>00</sup>**

### 3D Bespoke Skin Tightening

Radio Frequency works to effectively tighten the skin for a more youthful smoother and toned looking skin. Ideal for stretch marks, loose skin on arms, thighs bum or stomach.

**30 min session £55<sup>00</sup> course of 8 £390<sup>00</sup>**

**60 min session £100<sup>00</sup> course of 8 £720<sup>00</sup>**

### 3D Bum Lift

A combination of micro current, radio frequency, cavitation and shockwave will sculpt, tone, firm and lift the buttocks. Muscle lifting, skin tightening and fat reduction are combined to give an amazing transformation of this area.

**1 session £95<sup>00</sup>**

**Course of 6 £550<sup>00</sup>**

### 3D Fat Freeze

Using 3D-cryotherapy to target stubborn pockets of fat, the cells are lowered to minus 6 degrees causing 20% - 40% of the fat cells in that area to die.

**Treatment Price £200<sup>00</sup>**

*\*Please note this treatment will cause bruising and redness which could last up to 4 weeks and results are seen after 2-4 months. Aftercare must be followed.*

### 3D HIFU Targeted Fat Removal

Using the latest non invasive technology target specific focused areas of fat in the fastest possible treatment time. High Intensity Focused Ultra sound obliterates fat cells for good.

**Treatment Price £400<sup>00</sup>**

### Thigh Gap Treatment

Using duo 3D-cryotherapy to target stubborn fat in this area to help sculpt and define the inner thighs, followed by three weeks of shockwave therapy for noticeable results.

**Treatment price £250<sup>00</sup>**

### Bingo Wings Treatment

Using duo 3D-cryotherapy to target stubborn fat in this common problem area. A bespoke treatment program will be devised to also tighten and tone the loose skin in this area for a complete approach.

**Treatment price £250<sup>00</sup>**

### Chin Freeze

A one off treatment on the chin area using 3D fat freeze to reduce the fat under the chin.

**Treatment price £125<sup>00</sup>**
